

DUAL PUMP CONTROL PANEL

- Three models available at 0.55, 0.75 or - 1.1kw rating
- IP55 rated enclosure
- Door interlock main switch
- Volt-free contacts on alarm circuit
- Sensitivity and time delay adjustment for current protection circuit
- Sensitivity adjustment for level switches/probes (alarm) circuit
- Pump duty cycling
- Thermal circuit breakers with optional contacts for remote alarms
- Fuses for pump and auxillary circuit protection
- Enclosure drilled with six holes and supplied with cable glands
- Configuration links for: empty or fill switching (in alarm circuit), disable alarm, disable current protection

Control panels for the safe and reliable operation of single pumps. The robust ABS enclosure has an interlock switch on the cover, preventing the panel from being opened whilst the unit is switched on. Demand and dry-run protection switches can be wired in to give fully automatic pump operation. The volt-free contacts can be used to provide a BMS signal.

Panel internals with terminal block and DIN rail

Single pump control panels and variable speed controllers are also available.

Flexible System Design

This comprehensive range of specialist items has been developed specifically for Rainwater Harvesting Systems. Because the range consists of separate components, it has exceptional flexibility.

These items are suitable for almost any system design, whether you're planning a system for a small house, school or large industrial or commercial premises.

We are the UK's sole supplier of Wisy products for rainwater utilisation
